PROFESSIONAL SUMMARY:

Detail-oriented and analytical MCA (Cybersecurity) student at Symbiosis Institute of Computer Studies and Research Centre with a strong foundation in cybersecurity, networking, operating systems, cloud computing, and security monitoring. Hands-on experience in building security-focused projects, including a Wazuh SIEM lab, cloud security dashboards, and rule-based threat detection systems. Skilled in log analysis, incident response, system administration, and problem-solving. Eager to contribute technical expertise and a continuous learning mindset to an entry-level Cybersecurity or SOC Analyst role.

Degree	Board	Institute	Remarks	%/CGPA	Year
MSC (CA) (CYBERSECURITY)	SIU	SYMBIOSIS INSTITUTE OF COMPUTER STUDIES AND RESEARCH	PURSUING	Current: 7.19	2025-2027
BSC. COMPUTER SCIENCE	SPPU	NOWROSJEE WADIA COLLEGE PUNE	COMPLETED	7.15	2025
Class XII	MAH. BOARD	SADHU VASWANI JR COLLEGE	COMPLETED	69.33%	2022
Class X	CBSE	RYAN INTERNATIONAL SCHOOL SANPADA	COMPLETED	78.4%	2020

PROJECTS

Real-Time Cloud Security Event Dashboard	- Built an end-to-end cloud SIEM dashboard on Microsoft Azure using FastAPI, real-time event streaming, REST APIs, and interactive visualizations. - Deployed a containerized microservices architecture using Docker and Azure Container Registry (ACR), improving deployment consistency, portability, and scalability.
Open - Source Wazuh SIEM Lab	- Designed and deployed a Wazuh-based SIEM environment comprising Wazuh Manager, Wazuh Indexer, and Wazuh Dashboard for centralized security monitoring. - Integrated Kali Linux endpoints with Wazuh agents to enable centralized log collection, event analysis, and threat detection across systems. - Configured real-time alerting and security monitoring workflows to support incident detection, investigation, and response.
Rule-Based Cloud Authentication Threat Detection and Alerting System	- Developed a rule-based detection engine to identify suspicious authentication activities, including brute-force attempts, impossible travel events, new-country logins, and multi-factor authentication (MFA) failures. - Implemented severity-based alert generation and automated incident reporting from cloud authentication logs to support efficient security monitoring and incident response.
Technical skills	Cybersecurity: Wazuh SIEM, Security Monitoring, Log Analysis, Incident Response, Threat Detection, SOC Operations Operating Systems: Kali Linux, Ubuntu Linux, Windows Networking: TCP/IP, DNS, HTTP/HTTPS, Network Troubleshooting Programming Languages: Python, C++, PHP Cloud Platforms: Microsoft Azure, Firebase

Certifications

- Tata Cybersecurity Analyst Job Simulation – Forage | Jun 2026
- Certificate Course & Examination on the Digital Personal Data Protection Act (DPDPA), 2023 – DPDPA.com | 2026
- Deloitte Cyber Job Simulation – Forage | Aug 2025
- Getting Started with Artificial Intelligence – IBM | Jan 2025
